Purpose

The summit will provide an overview of the Clean Energy Workforce Training Program and the Energy Commission's interagency agreement with the Employment Training Panel (ETP) and the contracts that may be funded to provide training for jobs related to energy efficiency, water efficiency, and renewable energy (distributed generation and utility scale). Helping unemployed and underemployed workers, incumbent workers and new workforce entrants secure clean energy job skills will enable California to achieve its clean energy future and will also help to accomplish economic recovery efforts initiated by ARRA.

Background

The California Clean Energy Workforce Training Program is a collaborative effort of the California Energy Commission, California Workforce Investment Board (CWIB), Employment Development Department (EDD) and ETP. Funding for from the American Recovery and Reinvestment Act (ARRA) for the State Energy Program (SEP), Workforce Investment Act Governor's Discretionary funds, and the Alternative and Renewable Fuel and Vehicle Technology Program established by AB 118 (Núñez, Chapter 750, Statutes of 2007). These funds and local leveraged funds are expected to serve as the foundation for the largest "green" initiative in the nation.
